Cessna T206H

HX Intelligence

HX Assessment

The Cessna T206H is built for owners whose missions demand more than a typical piston single can provide. Its combination of turbocharged performance, substantial carrying capacity, and straightforward operating characteristics has earned it a longstanding reputation across personal, commercial, and backcountry flying. The spacious cabin and fixed-gear design make it equally comfortable transporting passengers, equipment, or both without introducing unnecessary complexity. For operators who prioritize capability, flexibility, and dependable utility over outright speed, the T206H remains one of the most versatile aircraft available in its class.

Operational Reference

Cruise Speed	**151 knots**
Published Range	**1,425 nautical miles**
Maximum Takeoff Weight	**3,600 lbs**

Source: Vref Aircraft Value Reference (2021 Vol. 4).
Actual performance varies by configuration and operating conditions.

Key Features

Turbocharged Performance
Maintains strong climb and cruise performance while preserving power at higher-density altitudes.

High-Wing Utility
Excellent visibility, easy cabin access, and the ability to operate comfortably from a wide variety of airports.

Exceptional Useful Load
Carries passengers, baggage, and fuel with the flexibility expected of a true utility aircraft.

Modern Garmin Flight Deck
The G1000 NXi integrates navigation, engine monitoring, weather, and situational awareness into a capable IFR platform.
